DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 8, 2009 has been entered.

Claims 5-8 are currently amended.

Claim 12 is newly submitted.

Claims 1-4 and 9-11 are cancelled.

Claims 5-8 and 12 are pending and are examined on the merits.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on April 9, 2007 and resubmitted on July 8, 2009 has been considered by the examiner.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 5 and 6, and claims 7 and 8 dependent thereon, are indefinite in the recitation of "without a significant increase in long chain fatty acid components of seed oil", given that it is unclear whether the level of long chain fatty acid components is to be determined as a total amount or if it would be a percentage of the total fatty acids.

3. Applicant's arguments filed July 8, 2009 have been fully considered but they are not persuasive. Applicants argue that the amendment of the claims should overcome the rejection. The Examiner maintains that the amendment of the claims has clarified the meaning, in part. However, the claims are still indefinite for the reason set forth above.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jaworski et al (US Patent 6,307,128 in IDS of 7/31/06) as stated in the last office action.
7. Applicants' arguments filed July 8, 2009 have been fully considered but they are not persuasive. Applicants argue that the amendment of the claims should overcome the rejection.
8. The Examiner maintains that the language of the claims is indefinite, as set forth in the rejection under 35 USC 112, 2nd paragraph, as stated above, and that the production of plants transformed with SEQ ID NO: 2 taught by Jaworski et al is the same as that claimed. It is noted that claim 5 also does not recite a step for selecting a transgenic plant that has high oil content, wherein there is no statistically significant increase in the proportion of long chain fatty acid components of seed oil relative to seed oil from a plant of the same species that is not transformed with the claimed construct. Furthermore, the rejection is maintained for claim 7 given that the claimed plant would not be distinguishable from a plant made by the same method and comprising the same nucleic acid sequence that is taught by Jaworski et al.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Claim 12 is allowed.
